PROFESSIONAL EXPERIENCE

Mynx Softwares Pvt. Ltd.
Full Stack Developer

Jan 2025 - Present

Architected and scaled a mission-critical Electronic Medical Record (EMR) platform designed to streamline clinical workflows for healthcare providers. Directly responsible for solving complex data latency, automation, and hands-free accessibility challenges using a robust full-stack JavaScript ecosystem and secure AWS cloud infrastructure.

Core Engineering Achievements & Problem Solving

- **AI Voice Agent & Automation:** Spearheaded the integration of a low-latency, LLM-powered AI Voice Agent utilizing WebSockets for real-time streaming. Solved physician documentation burnout by converting spoken dictation into structured medical SOAP notes, reducing daily administrative workloads by 45%.
- **Frontend Performance Optimization:** Redesigned a sluggish patient dashboard suffering from deeply nested JSON payloads. Implemented efficient React state management, client-side caching, and windowed rendering alongside an atomic Tailwind CSS layout, slashing initial page load times from 6.2s to under 1.4s.
- **Multi-Tenant Scheduling & Routing:** Integrated Google Calendar API with asynchronous webhook listeners to eliminate multi-practitioner scheduling conflicts. Combined this with Google Distance Matrix API to dynamically calculate optimal routes for home-care visits, increasing weekly patient visits by 18%.
- **Hybrid CI/CD & Cloud Infrastructure:** Unified fragmented release cycles across a split GitHub Actions and Bitbucket Pipelines ecosystem. Standardized containerized build/test workflows for automated, zero-downtime deployments to AWS (S3, CloudFront, EC2) using IAM roles, reducing pipeline deployment times from 40 to under 8 minutes.
- **Technical Leadership:** Mentored junior engineers, established strict Git branching workflows, and enforced code quality via rigorous automated linting and peer code reviews.

Core Tech Stack

- **Frontend & Core:** JavaScript (ES6+), React, Tailwind CSS, Responsive UI, WebSockets
- **Cloud & DevOps:** AWS (EC2, S3, CloudFront, IAM), GitHub Actions, Bitbucket Pipelines, CI/CD
- **APIs & Integration:** Google Calendar & Maps APIs, Voice AI, Speech-to-Text (STT) Webhooks

Plantsmed Laboratories Pvt. Ltd.
Web Developer & Designer

May 2024 - Dec 2024

- Built responsive front-end interfaces using React.js, Redux, and Bootstrap optimized for cross-device performance
- Designed visual assets and marketing materials for digital campaigns and internal communications
- Managed dynamic content through MySQL databases and content management systems
- Developed Node.js backend with event-driven architecture for seamless data handling
- Created user-centric designs with consistent visual branding across web and social platforms

- Proficient in building scalable and secure backend architectures using Node.js and Express.js,
- Engineered and optimized database schemas in MongoDB, enhancing data retrieval speed by 40% through effective query optimization strategies while maintaining robust data integrity for large-scale applications.
- Experienced in creating RESTful APIs to support dynamic, data-driven applications, with a focus on performance, security, and maintainability.

DESIGN AND DEVELOPMENT PROJECTS

Job Portal with ATS

- Designed an intuitive UI-driven Job Portal Web application in ReactJS powered by NodeJS for backend; focused on seamless data handling with Supabase which improved data retrieval speeds by 40% compared to earlier solutions.
- Integrated CRUD features for Admin and Applicant Dashboard.
- Integrated Resume Parsing, Profile shortlisting and Chatbot with AI features with Open AI API.
- Refined data management and enhanced UI design for better navigation.

MYai500 - AI Calling Agent

- Developed VoiceCalling Agent with scheduling and booking capabilities for real time customer Support.
- Inbound and Outbound calling with Twilio webhook.
- Used STT from Deepgram, LLM from Open AI API, TTS from ElevenLabs and React for Dashboard.
- Multilingual Capabilities using Eleven Labs multilingual API.

Biosap E-Commerce Web Application

- Designed an intuitive UI-driven Hotel Reservation application in ReactJS powered by NodeJS for backend; focused on seamless data handling with MongoDB which improved data retrieval speeds by 40% compared to earlier solutions.
- Refined data management and enhanced UI design for better navigation.

PROFESSIONAL SKILLS

- | | |
|--|---|
| <ul style="list-style-type: none">• Typescript, Javascript ES6+, React JS, Next JS, HTML5, CSS,• Database Management: MongoDB, Supabase, MySQL• Backend Framework: Node Js• | <ul style="list-style-type: none">• Agentic AI, VAPI, Whisper, ElevenLabs, N8N• Software testing• Version Control : Git RESTful APIs• Wordpress, Shopify, WIX, WebFlow• ADOBE Creative Suite• Affinity Suite |

EDUCATION & CERTIFICATIONS

B.Tech (MAE) + M.Tech (AME) **CGPA - 7.27**

AMITY UNIVERSITY UTTAR PRADESH (2022)

Major Projects :

- Effect of Antioxidants on Oxidation Stability of Biodiesel
- To study the properties and applications of NITINOL (Shape memory Alloy)

12th (PCM) (2017).

89.2 %

RYAN INTERNATIONAL SCHOOL GHAZIABAD

SKILLS AND QUALITIES

- Leadership
 - Enthusiastic and friendly professional
 - Workflow management
 - Conflict resolution
-
